Select Auto ISO sensitivity control. Select ISO sensitivity settings in the photo shooting menu, highlight Auto ISO sensitivity control and press 2. Select On. Highlight On and press J (if Off is selected, ISO sensitivity will remain fixed at the value selected by the user).

Auto ISO Sensitivity Control

The Auto ISO Mode is a feature on some cameras where the camera decides what should be the optimum ISO for the exposure. The camera reads the aperture and the shutter speed in use and then depending on the scene and the metering mode, dials in the ISO number it feels is right. Typically, the photographer sets the ISO, but in some situations, it is best to hand over the decision-making process to the camera and switch to the Auto ISO Mode.
